

JIM CHRISTIAN AYCO

JUNIOR SOFTWARE DEVELOPER

AI Automation | Workflow Automation | API Integration | Web Development | UI/UX Design

Bacolod City, Negros Occidental, Philippines | 09945483984 | jimchristianayco@gmail.com

ABOUT ME

Junior Software Developer focused on AI automation, workflow automation, API integration, web development, and UI/UX design. I create practical solutions that improve business processes, reduce repetitive work, and make digital tools easier to use.

My professional experience includes production automation, email campaigns, lead generation, data workflows, WordPress updates, and interface improvements. I also build web and mobile systems for freelance and academic projects.

PROFESSIONAL EXPERIENCE

Enki.AI | Junior Software Developer | 2026-Present

- Designed and maintained production n8n workflows for business operations.
- Built lead-generation, email-campaign, validation, follow-up, and click-tracking automation.
- Implemented multi-account email routing and logic that preserves the correct message thread.
- Integrated APIs, Gmail, Google Sheets, HubSpot, and other tools for automated data movement.
- Created filters and segmentation for company and personal email campaign records.
- Tested, monitored, troubleshooted, and improved workflow reliability and campaign output.
- Supported WordPress CTA updates, download-form flows, and product-page fixes.
- Collaborated with team members on carousel content, and UI improvements.

EDUCATION

STI West Negros University

Bachelor of Science in Information Technology | 2022-2026

ACHIEVEMENTS

- Dean's List Awardee (2022-2023)
- 2nd Place - Sumobot Competition
- Member, House of Robotics

CORE STRENGTHS

Process Analysis | Troubleshooting | Collaboration | Attention to Detail

SELECTED PROJECTS

Enki.AI Automation Work

- Developed and maintained automated lead-generation and email-campaign workflows.
- Built follow-up logic, click tracking, validation, segmentation, and multi-account email routing.
- Supported WordPress pages, CTA buttons, HubSpot download flows, and UI fixes.

Barangay Resident Portal

- Built a web-based resident management system for profiles, certificate requests, appointments, announcements, and reports.
- Implemented QR-based processes, role-based access, and administrative monitoring features.

La-ag Smart Tourism Platform

- Created a mobile tourism platform with maps, geofencing, QR tracking, reviews, ratings, and destination content.
- Added smart recommendations, itinerary support, badges, rewards, and tourism analytics.

Emergency Response Application

- Developed emergency reporting with geofencing, live incident mapping, SOS functionality, and responder assignment.
- Designed mobile interfaces that help users submit incidents and view response status.

VeggieShop Marketplace

- Built an e-commerce marketplace connecting farmers and buyers through product listings, cart, chat, and payments.
- Designed responsive buyer and seller interfaces for product and order management.
